

World Certification Services Ltd. (WCS) was formed in 1993 in order to supply competitive, cost effective and impartial third-party assessment and certification services to businesses of all sizes. Services are openly available and are not restricted in any way. Our goal is to achieve and sustain quality in everything we do, so as to always meet our clients requirements. As every member of the Company has an effect on quality, each person is responsible for the quality of work that they perform and for working in such a manner that client satisfaction is ensured.

WCS has established procedures for the certification of ISO9001, ISO14001, OHSAS 18001, AS9100, ISO22000, ISO 27001, HACCP management systems, and steps are currently being taken to extend this to include additional schemes.

World Certification Services Ltd. has been granted accreditation by the United Kingdom Accreditation Service (UKAS) and by the ANSI-ASQ National Accreditation Board (ANAB), thus allowing WCS and its clients to use the prestigious “tick and crown” and ANAB logos for accredited certification. WCS scopes of accreditation are subject to ongoing review by the WCS management team and also by an Impartiality Committee Board, in order to ensure that client needs continue to be met. Our present scopes include a wide range of industrial and business sectors.

What we provide

- Competitive, cost effective and impartial certification services for businesses of all sizes.
- No hassle approach from the time of initial enquiry, through to application, assessment, and certification.
- Sensible fees for certification, assessment and surveillance, and a low cost scheme for Small Businesses.
- Experience of most industries and business sectors.
- Experienced Lead Auditors with the ability to undertake their work impartially and in a friendly manner.
- National/International recognition of our clients management systems.

Certification Process

Following receipt of a completed request for quote form, WCS will produce a quote detailing the costs involved for three years certification. Once the quote has been accepted the client is contacted to arrange for a Stage One Audit. This is aimed at ensuring that the system meets the requirements in the applicable assessment standard or schedule and that the scope of assessment is correct. When the Stage One is complete a written report is provided and any areas of concern are corrected by the client. Once the areas of concern (if any) have been corrected the Stage Two Audit can be planned, and a mutually convenient date is agreed for it to be undertaken. Stage Two Audits are undertaken by auditors having the required training, experience and expertise for the business concerned. On completion of the assessment a written report is provided and a recommendation regarding certification is made.

Following a successful Stage Two Audit the client is awarded a Certificate of Registration. Routine surveillance visits are undertaken to ensure the management system is continuing to be maintained. Clients details are then submitted for inclusion in any relevant online databases for the particular scheme.

Following certification, clients are entitled to use the WCS certification marks incorporating the UKAS “tick and crown” and ANAB logos shown below. The applicable mark will be sent to the client with the certification fo registration. If WCS is not accredited for the scheme / scope then this will be communicated during the contract review process.
